Senday School Teachers' Meeting .-- A seting of the Northwest New-York Sunday School sechers' Association was held on Sunday evening at the abyterien Church, (Rev. R. S. S. Dickinsons's) at be corner of Houston and Thompson sts. The services of the evening were commenced by singing the 8th realm by the Choir, and prayer by Rev. Mr. Dickinson. Lev. Mr. Canfield, Secretary of the Sabbath School Union, then arose, and said, that as Rev. Mr. Chidlaw, of Ohio, and Mr. L. B. Tousley, of Canandaigus, were present, and were expected to speak, he would occupy their time but a few moments, in order to make a few statements; and said that in this City and vicinity, it is ed that there are at present 75,000 destitute and depraved children, who are growing up in life a of ignorance, dissipation, wretchedness and crim He had been informed by a gentleman who had recently returned from a visit to London, Vienna, and other cities, that "nowhere had he seen such destitution and wretchedness among the children as in portions of this City." The speaker also said that within a few years, he had traveled over the greater portion of the United States, and nowhere was there such wickedness among the juvenile portion of community as in this city, and that but a short time since, while in one of car balls of justice, a boy but 7 years of age was arraigned on a charge of stealing, and was sentenced to confine-

On inquiry he ascertained that at the age of five years, this lad hed been sent out by his mother to steal; and this is only one instance in many thousands, where children are instructed in the first rudiments of crime by their Parents; and there are now incarcerated in the cells of our city prison, four men doomed to an ig-noble death on the 28th of this mouth, three of whom ere taught the first lessons of crime by their parents; had never attended Sabbath Schools, or received any Instructions from the Bible. The speaker also cited several instances of children, that had been taken from the streets and induced to attend Sabbath Schools, by which means they had not only been reclaimed, but had become ornsments to society.

Rev. Mr. Chidlew, of Ohio, next spoke, and said,

that some time since, he had learned that the Ministers of this City were about taking steps to have out-door preaching in various parts of the City, in order to reach that portion of the community who never attend divin-worship, and could not be induced to enter the ho-of God; they, (of the West.) had also learned of the ment of the Sunday School Union, and your labors of love, reclaiming young souls from everlasting ruin. Your success in this cause has encouraged us in the West to make an effort, and we have already very many Sabbath Schools established. It is estimated that in the Northwest there are 200,000, of children without adequate means of improvement. The principal reason of this is, the immense immigration constantly flowing in there, of persons of every country, many of whom are too distant from public schools to derive any benefits from them, while others are too poor. Where Sunday schools have been established, and children gathered into them they have evinced a desire to gain knowedge, and although they are found to be very ignorant, they are not hardended by vice like the children of the Upon this point the American Sabbath School Union is accomplishing much good, as it is composed of members of the various Protestant denominations. There are, however many counteracting influences brought to bear. There are many associations of infid els, one of which, near Cincinnati, numbers over 1,200 members ; the country is also flooded with infidel lit erature, in the shape of newspapers, books, and vile pamphlets, and there is a great lack of religious elements in the institutions of learning, and the reading of the Bible is an exception and not a rule. The speaker also spoke at some length in regard to the duties of parents, instructing their children in the fear of the Lord.

Mr. L. B Tousley, then addressed the audience for some time, in a very interesting address, in which he related many interesting events which have come under his own observation, after which the meeting was

THE RAILROAD ACCIDENT .- An inquest was held on Sunday by Coroner Johnson, of Westchester County, upon the body of Joseph H. Ming, and the folowing verdict returned :

lowing verdict returned:

We, the jury, find—That Joseph H. Ming came to his death by a collision of the Port Chester passenger train, belonging to the New-York and New Havan Railroad Company, and the Albany express freight train belonging to the New-York and Harlem Railroad Company, on the morning of the first day of January, between the hours of six and seven o'clock, near the junction of the Mortennia branch Railroad with said Harlem Railroad, in the said township of West Farms. We also find, that the said collision of the said trains was caused by the culpable carelessness of John J. Campbell, engineer of the said Port Chester train, upon said day, by running at a high rate of speed while passing the stations, and in not keeping a sufficient look out for cautionary signals. And as jurors and citizens of Westchester County, we would respectfully recommend that the said New-York and New-Haven Railroad Company instruct the agents and engineers to use the utmost caution in approaching and passing stations in this county, and also that they decrease their speed in passing the same.

The Board then adjourned to Wednesday afternoon, at 5 o'clock.

Daring Burglary at the House of the Belgian Consul, Mr. H. W. T. Mali, in One Hundred and Twelithes, near Twelithes, was entered by three burglars who forced open a front window and proceeded to appropriate to themselves a quantity of gold and silver plate, together with several articles of jewelry and some rich clothing which they found in different parts of the house. One of them, however, entered the room of a founds servant, who being aroused by the noise, gave the alarm, when Mr. Stary, brother-in-law to Mr. Mali, arose, and having awakened the latter gentleman, the two went down stairs in pursuit of the barglare. They had, however, taken fright said field, carrying off with them considerable valuable plunder. The police were then called and soon observed all three running down Eighty secondst. Officers McCerty, Eagin and Rockwell, of the Ninetsenth Ward, after a long chase, overhauled and captured two of the gamp, named Robert Gardinier and William Peeples, who, on being searched, were found to have plate, jewelry and clothing in their possession. The other fellow being more fleet, kept on to Fifty eighth st., on the Harlsem Raffroad, with Officer Rockwell after him; at their possession, the other fellow being more fleet, kept on to Fifty eighth st., on the Harlsem Raffroad with Officer Rockwell after him; at that poist, to avoid capture, he jumped down a precipice, 25 feet deep, and being uninjured, continued his flight; the officer took a short cut and soon came up with and captured him. This fellow gave his name as Carl Schultz, and with the others was taken to the Police Steiton, when he too, was searched, and found to have concealed about his person, several articles of value. After the three were locked up, Sergeant Colvin dispatched the Officers back to see whether the follows had dropped any of their plunder on the way. They succeeded in finding a gold-handled penduffe, gold pendid case, and some other articles, together with a cold-c

VIOLENT ASSAULT UPON A POLICEMAN .- On VIOLENT ASSAULT UPON A POLICEMAN.—On Sunday night officer Feldman of the 11th Ward Police, while on duty in Ninth-st, observed a gang of drunken rowdies engaged in a fight. He instantly roshed in among them and seized the leader, whom he was about to take to the Police Station, when the whole gang, consisting of about fifteen men set upon him, knocked him down, tore off his star, wrenched his club from his hand and banged and best him in a most brutual manner, besides stealing his gold watch worth \$60. Officers Thorn, Wade and Bostwick hearing his crice for assistance hastened to the spot and succeeded in arresting two men named Edw. Riley and Jas. O'Neal, both of whom stand charged with being concerned in the out-

art, this morning, to answer the crime charged against

risco. They were taken before Justice Wood and committed to await examination. Others of the gang are known and will probably soon be arrested.

FATAL RAILROAD ACCIDENT .- Yesterday afternoan, a German girl, 18 years of age, named Auma McGerren, residing at the corner of West Broadway McGerren, residing at the corner of West Broadway and Duene-st, in attempting to cross the railroad track in West Broadway, just in advance of one of the Sixth-sv. cars, downward bound, and being too slow in her movements, was knocked down by the horses, and before the driver could possibly stop the car, was run over by it, and had both her legs and one arm crushed. She was immediately taken, while insensible, to the N. Y. Hoepital, where she died soon afterward. It is stand by two witnesses of the melancholy occurrence, that every effort was made by the driver to prevent the accident, but the deceased being very near the horses when she made the attempt to cross the track, it was found impossible to apply the brakes with sufficient force to stop the circa in time. An inquest will be held upon the body this morning, when, if want of care is attributable to any person it will probably then appear.

THE PEOPLE'S LECTURES.—Rev. T. STARR KING, of Boston, gives the Fourth Lecture of the course at the Tabernacle This (Tuesday) Evennuc. His subject, "Substance and Show or Facts and Forces" will give ful scope to his terse and vigorous mind, and if ridiculous customs and popular errors do not awaken his wit and call into play his well-known power of oratory, we are mistaken in the man and his subject. Mr. King is one of the most popular speakers of the day, and will command a crowded house. We see by the Commutace's Circular hat the object of this lecture is "to show the absurdity of estimating the substantial realities and forces of nature and society by any senanous measurement. It takes up some of the most beautiful discoveries and astenishing facts of science; aims to uncover the shell of society and instory, to show us the real forces underneath; it criticises personal characters, pointing out the difference between human substance and the noise and show with which dollars and tailors invest men. The points are various, and the illustrations humorous." THE PEOPLE'S LECTURES .- Rev. T. STARS

Alderman Fowler claimed that it was, and spoke at some length in favor of his opinion. The President ruled the motion in order. Alderman Fowler appealed from the decision, when, by vote of the Board, was sustained. They then proceeded to a formal ballot for a President, with the following result:

The whole number of votes cast were 21; of which John Rice, (Dem...) received 13; Charles R. Marvin, (Whig) 6; Abraham B. Baylis, (Whig) 1; Blank, L. John Rice having received a mejority of the votes cast was declared elected. The Board now adjourned from the executive session and appointed a Committee to wait upon the Mayor and inform him of their organization, and that they were ready to receive any communication he might desire to lay before them. The Mayor soon appeared and delivered his Message, of which the following is substract:

If commences by calling attention to the defect in cleaning the streets under the old contract system, and urges the consideration and adoption of other measures which would prove more effective. He goes into a history of the Sunday ordinance, and riates that the passage of the law was actually necessary to repress the growing crime of drunkenness and evils arising therefrom, and is convinced that nine-tenths of our citizens are favorable to its continuance and proper enforcement. The water project is next alladed to, in which he recommends that they pin proposed by Mr. McAlpino for supplying the City with water be adepted. The aggregate cost is estimated at \$3,406,630, averaging \$21 to each in-abitant. He dwells at length upon the advantages that would arise therefrom. In the matter of insurance alone upward of \$100,000 could be aveal annually, and the expense for constructing and repairing cistorns amounting to \$15,000 per annum, being 14 per cent, on the annual interest, would be entirely avoided.

On a judgment obtained in 1847, in this Court
by James N. Ohey. The case was tried before, when a
defense was put in that defendant did not know of the
suit, he being a resident of Connecticut; he also wished
to set up a decision of a Court in Connecticut, on suits
entered there in 1848, declaring the judgment void, but
the Court, on the last trial, refused to admit the ovidence
to Connecticut, and a variety was general for plainas to Connecticut, and a verdict was entered for plain-tid, but set aside by the General Term; which granted new trial. The complaint was dismissed, with leave 's appeal without security.

CIRCUIT COURT-Before Judge ROOSEVELT WILL OF THE LATE JOHN MASON.
Feigned issue to try the following questions:

1st. Whether the paper in the pleadings purporting to be the will of John Mason, was his last will and testa ent : 2d. If so, was he of sound mind and memory, and in

ment?

2d. If so, was he of sound mind and memory, and in all respects capable of making a will?

3d. Did he at the time of subscribing the will, declare it to be his last will and testament?

4th. Did the attesting witnesses sign it at his request?

5th. Was it obtained by fraud and undus influence, or by force or coercion on the part of defendants, or either of them?

Mr. Mason, it will be recollected, died in 1839, possessed of a very large state. A short time previous to his death he executed a will, devising to some of his children, one eighth each, in fee, of his estate—the remainder he placed in trust to be paid annually to his daughter, Mrs. Alston, for life, with remainder to her children, and an annuity to her husband, if he survived; also similar bequesta to his son James, and a provision for his son John Mason, who was not of sound mind. Mrs. Alston contested the probate of the will, but the them-surregate admitted it to probate; it was then spealed to the Circuit, Judge Kent then presiding, who silvened the decision of the Surrogate, and the case was further carried, on appeal, to the Supreme Court, which reversed the decision of the Surrogate, and ordered the present feigned issue. The case is on.

The business of the year at the Stock Board opened with considerable animation, and prices are well sustained without any marked buoyancy. The principal activity was in Nicaragua, of which 4,000 shares were sold, opening at 38 and closing at 381. The dismissal of Senor Marcoleta by Mr. Everett whose letter was published exclusively in The Tribune, bad a favorable effect upon the stock. Erie was firm at 93] at the close, showing an improvement. Harlem was also well sustained. Long Island was heavy and closed at 311 bid, a decline of cent. Stonington is in better request and firm Hudson River is firm. Morris continues active and steady. The Coal Stocks are active. Cumberland is firm at about 67. Parker Vein advanced 1 P cent., selling at 67, short buyer's option. Phoenix was buoy ant in the morning but closed heavy. New-Creek fell off, but at the Second Board regained its firms Jersey Zinc is steady at 134. The Premium Stocks are firm but the sales are moderate. There will proba-bly be more doing in their investment in stocks in a few days, after the January dividends are disbursed. In Bonds the business was moderate, excepting of Erie Convertibles, of which 25,000 were sold at 102. At the close the feeling was good.

The Exchange market is dull and quotations tend downward. Leading drawers of Sterling ask 95, but sell at 94. The range is 9@9; for first class signstures. Continental Exchanges are also dul

Freights are dull, but firm. To Liverpool 300 bales Cotton jd.; 50 tuns Oil Cake 30/; Flour 3/6@ 4. asked; Grain 11@11jd asked. To London 3/9@4/ sked for Naval Stores; 3/6@4/ for Flour. For London a ship was taken up to load Resin and Turpentine at Wilmington at 5/. To California there is a fair business doing. An entire cargo of lumber, 200 M, was en gaged at \$45.

The disbursement for dividends, interest, &c., have not yet reached the channels of trade, and consequently there has been yet no marked change in the Money market. On call the demand is good at 627 P cent among the stock houses, but the deposit houses are receiving at 526 P cent. The Banks are not lending very freely. Paper of first class is only in moderate supply and is passed at 637 P cent. The West is still drawing freely in this City. Probably not less than two millions of dollars were paid out to-day for interest and dividends on various public stocks, railroad bonds, &c. The Sub-Treasury disbursed over half a million. Messrs. Winslow, Lanier & Co. paid on nearly forty different securities, which were, almost without exception, negotiated by that house during the last year or two.

The receipts at the Sub-Treasury were 124,683. Psid, \$34,177. Balance, \$2,521,804. . For Reading stock 86 was bid, dividend off, which is equal to about 97. It was offered at 87.

There is considerable inquiry for good railroad bonds for foreign investment, and the market is firm, with moderale supply. We notice sales of \$75,000 Harlem 7 F cent. at 101 and interest, and by Mesars. Delaunay, Iselin & Clarke, \$100,000 Ohio and Pennsylvania 7s. at 103 and 109 for Second and First Mortgage. The business of the Cleveland, Columbus

and Cincinnati Railroad for the past season, has been remarkably great. Perhaps no public work in this or any other country has ever yielded a larger product upon the same length of line and cost.

Mortgage and Convertible Bonds of the Mayaville and Lexington Railroad Com-pany, interest and principal payable in this City. This Road is 67 miles in length, and will cost about \$1,500, 000, thus the above Bonds, being the entire issue, represent only one-third of the cost of the Road, the subscriptions, of which two-thirds are paid in, reach \$1,033,511. The Road, it is believed, will be ready on the 1st December next. As its name indicates, it con nects Maysville, on the Ohio River, with Lexington, and a junction has been effected with the Covington and Lexington Road from Paris to Lexington, thus mak ing a considerable saving in the cost of construction. The Road runs through a very wealthy portion of the State, and will, in the course of short time, have valua-ble connections with other lines running East, North and South. An estimate of the business of the first

year shows a favorable result: Passengers and Mails 896,250 Total Receipts . \$251,250

From the Annual Report of the President of the Little Miami Railroad Co, we learn that within the past year that Road has carried 212,687 passengers, being an average of 560 per day.

This Road has been in operation about ten years.

The completion of the Lake Shore lines of railway,

giving a direct communication with New-York, has had the effect of diverting from the New-Orleans route an immense amount of transportation in such articles as tobacco, four, &c.
About 3,000 head of cattle and horses, on their way to New York, have been carried over this line within the past three months, instead of being driven over the

mountains as hitherto. These facts, with many others that might be named, afford indications of a change about to be introduced by railroads, by means of which large masses of the products of the West and even the South-west, which heretofore found a market by way of the Ohio and Mississippi Rivers, will now reach the consumer by a

more direct route through the Atlantic cities. The gross receipts of this road for the year ending Nov 30, 1852, were. 6595,746 35 Total expenses for that period, including repairs, interest on debt, and all other items one 675 11

The efforts of the Board have been steadily dire to the improvement of the Road, the incree machinery and other facilities, and the enlarging of the capacity of the tracks and dépêts. The greater part of the Road has been fenced in, and the whole track will soon be protected from the intrusion of castle. Adoubte track has been commenced, and will be extended from year to year, as rapidly as the business of the Road shall require, with an especial view to the accommod tion of the additional trains and business from oth

We condense from The Albany Journal the following interesting abstract of the reports of some of the leading railroads of this State up to the 30th of Sep

In the return of the Buffalo and Rochester, we find
that 23 miles of the road has been sold for \$327,000,
which should be deducted from the amount given for
cost of Road and Equipment, which would make this
sum \$2.475,014 29.

In the Hudson River Report there should be added
to the cost of Road and Equipment the sum of \$1,007,

In the Northern Road there should be added to the
same account \$70.661 19; for docks, \$108,908 31 for
